An innovative and reliable solution combined with the Thermodiag armband

An Alliance of Technology, Comfort and Practicality

EXCEPTIONAL WEARING COMFORT

- » **Thanks to its ultra-fine, flexible polyurethane film**, the Thermodiag band tape guarantees a pleasant experience even for extended use. This cover must be changed every 24 hours.
- » **Skin-friendly:** its textured, perforated silicone adhesive is designed to be gentle on even the most sensitive skin and to wick away perspiration. Non-irritating, non-sensitising, non-toxic.
- » **Universal suitability:** the device fits perfectly to 85% of body shapes and arm sizes in a matter of seconds.

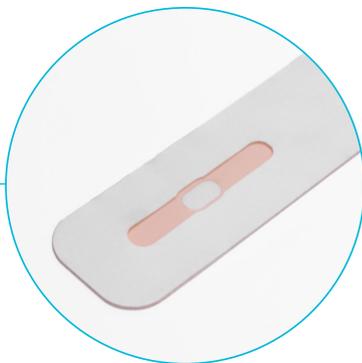

EASY TO FIT

- » **The intuitive and ergonomic tab** allows quick and precise fitting, optimising time for carers.

OPTIMAL PERFORMANCE

- » **The adhesive interface ensures reliable** and long-lasting skin-sensor contact, even on fragile or mobile patients.

PRACTICAL, SECURE PACKAGING

- » To ensure ease of use and compliance with the most stringent standards, the Thermodiag band tapes are individually packaged. Each individual pack includes clear, detailed instructions. This packaging also facilitates storage and transport, while ensuring optimum traceability and complete protection of the device until it is used.

INCREASED SECURITY

- » **An integrated safety hinge disengages** in the event of overtightening to prevent any tourniquet effect, ensuring risk-free use.
